MonseL's Paste & Lugol's Solution

MONSEL'S PASTE Item #96-1200

A ONE-TIME USE pre-mixed paste packaged in convenient ready-to-use bottles. Also includes 12 rayon tip applicators.

Sklar has converted MonseL's solution (ferric subsulfate) into an efficacious and conveniently packaged paste. As a hemostatic agent it is ideal to apply to cervical tissue following colposcopic biopsy, electrosurgical excision (LLETZ or LEEP) and ablative (LASER) surgery.

Sklar MonseL's is fabricated to relieve office personnel from the inexact and messy task of mixing their own compound for post-surgical treatment of their female patients.

LUGOL'S SOLUTION Item #96-1210

A ONE-TIME USE pre-mixed iodine solution packaged in convenient ready-to-use bottles. Also includes 12 rayon tip applicators.

This iodine contrast medium is also sealed in airtight bottles which assist in mitigating waste associated with the use of this product. The Lugol's works quickly to assist the Colposcopist to identify potentially diseased cervical tissue (CIN) by changing suspect tissue in the cervical transformation zone into a white "target" for excision or biopsy. Healthy tissue will remain unchanged by the application of Lugol's.
